

OWENSVILLE UTILITY SURVEY - 2010

The Town of Owensville has commissioned a Utility Study which includes Water, Wastewater, and Storm Drainage utilities. The purpose of this study is to evaluate existing public utility services in the town, and identify areas needing improvement and possible future upgrades. The Town values resident input to this process. Please fill out the following survey promptly and enclose it with your utility bill, or place it in the drop box at the Owensville Town Hall. You may also find this survey on our website, www.owensville.org, which you can fill-in and email back. Our email address is owensvillect@sit-co.net. Thank you for your participation.

Name (Optional): _____

Address: _____ Date: _____

List any issues/concerns about public **Water service** (i.e. low water pressure or flow, suspected system leaks):

How often/when do these issues occur?

List any issues/concerns about public **Wastewater service** (i.e. sewage backing up in your home, wastewater not draining only during heavy rains):

How often/when do these issues occur?

List any issues/concerns about **Storm Drainage** (i.e. large areas of standing water at roadways/ditches. Note that ponding water within your property lines is typically not public drainage):

How often/when do these issues occur?

Do you know what may be causing this issue?
